SUMMARY

DevOps Engineer with 1+ year of hands-on experience building and operating cloud-native applications in Agile environments. Skilled in AWS, Docker, Kubernetes, OpenShift, Helm, Terraform, Jenkins, GitHub Actions, Python, Bash, Prometheus, Grafana, ELK, and DevSecOps practices. Experienced in CI/CD automation, infrastructure as code, production deployments, monitoring, incident management, root cause analysis, networking fundamentals, and continuous improvement.

SKILLS

Cloud & Infrastructure: AWS (EC2, S3, RDS, EKS, IAM, CloudFront, ASG, ALB, WAF), Azure Fundamentals, Terraform, Ansible, IaaS, PaaS

Containerization & Orchestration: Docker, Kubernetes, OpenShift, Helm, ArgoCD, GitOps

CI/CD & Automation: Jenkins, GitHub Actions, GitLab CI, Release Engineering, Shell Scripting

Security & Networking: Trivy, SonarQube, Vulnerability Assessment, Container Security, DNS, TCP/IP, Load Balancing, Security Groups

Monitoring & Observability: Prometheus, Grafana, ELK, Alerting, KPI Monitoring

Programming: Python, Bash, C++

Databases: MySQL, PostgreSQL, MongoDB, ElasticSearch

Tools: Git, Linux, Jira, Agile/Scrum

EXPERIENCE

DevOps Intern

March 2026 – Present

NEC Corporation India Pvt Ltd.

Noida

- Managed production Kubernetes and OpenShift deployments using Docker and Helm.
- Performed application deployments, cluster operations, and troubleshooting in Kubernetes and OpenShift environments.
- Resolved P1/P2 production incidents through root cause analysis, reducing MTTR by 15%.
- Assisted in developing and maintaining CI/CD pipelines using Jenkins.
- Performed log analysis, networking troubleshooting and deployment validation across environments.
- Configured monitoring, alerting and dashboards using Prometheus, Grafana and ELK to improve platform reliability.
- Collaborated in Agile sprints with developers to drive continuous improvement and release quality.

DevOps Intern

May 2025 – March 2026

Zn Softech Pvt Ltd

New Delhi

- Automated AWS infrastructure provisioning using Terraform, enabling repeatable and scalable deployments.
- Built and maintained CI/CD pipelines using Jenkins for automated build, testing, and deployment workflows.
- Containerized applications with Docker and deployed them on Kubernetes clusters.
- Implemented monitoring using Prometheus and Grafana for proactive issue detection.
- Automated operational tasks using Bash and Python scripts.

PROJECTS

End-to-End DevSecOps Implementation

GitHub Link

- Implemented an automated DevSecOps pipeline integrating CI/CD, security scanning, and monitoring.
- Used Terraform for infrastructure automation and ArgoCD for GitOps-based continuous deployment.
- Implemented vulnerability scanning using Trivy and integrated monitoring with Prometheus & Grafana for proactive incident detection and observability.

Automated Static Website Deployment on AWS using Terraform and GitHub Actions

GitHub Link

- Designed and implemented an automated Terraform configuration to provision and host a static website on AWS S3.
- Enabled static website hosting and automated HTML/CSS uploads via Terraform.
- Configured a GitHub Actions workflow to run terraform init, validate, plan, and apply on each code commit for continuous deployment.

EDUCATION

B.Tech – Information Technology

2022 – 2026

Bhagwan Parshuram Institute of Technology · Rohini, Delhi

8.03 CGPA

12th – Syed Abid Hussain Senior Secondary School, JMI

2021 · 87.6%

10th – Syed Abid Hussain Senior Secondary School, JMI

2019 · 90.5%
